

# Thanksgiving COOKING INSTRUCTIONS

## HOURS/MINUTES UNTIL SERVICE:

- 1:45** Preheat your oven to 350° F for 15 minutes
- 1:30** Remove all covers, except for the lasagna. Add ½ cup of water to the bottom of the turkey pan and place on the center oven rack, bake for 1 hour
- 1:00** Place Butternut lasagna into the oven
- :30** Place mashed potatoes, bread stuffing, and sweet potatoes onto lower oven rack below the turkey. Continue baking the turkey (along with the side dishes) for an additional 30 minutes.
- :20** Add Brussels Sprouts to the oven, or simply saute them in pan right before serving. Remove the cover from the lasagna
- :05** Add Cranberry Grain Bread, if you would like to serve it warm

\*A note about cooking times; oven times and temperatures may need to be adjusted as many home ovens operate differently. It's best to plan for additional time just in case. If you have a convection oven, using the convection fan will generally speed up cooking times. Additionally, if reheating is taking longer than anticipated, it is perfectly fine to increase the temperature of the oven to 375° F or even 400° F, or if reheating seems to be going quite a bit faster, turn the oven down to 300° F and wait to put the green beans in the oven until you are closer to serving.
